Professional profile

Full Stack Web Developer with a solid academic background in Systems Engineering (UTN) and hands-on experience building modern web applications using React, Next.js, TypeScript, Node.js, Tailwind CSS, and PostgreSQL/MongoDB.

I specialize in developing intuitive user interfaces, efficient systems, and scalable solutions, applying best practices in frontend and backend development.

I am currently seeking my first professional opportunity in the tech industry, bringing strong analytical thinking, responsibility, and valuable soft skills acquired through customer service experience, such as clear communication, organization, and problem-solving.

Technical Skills

- **Front-end:** HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS, shadcn/ui
- **Back-end:** Node.js, Express.js
- **Databases:** PostgreSQL, MongoDB
- **Tools and libraries:** Git, GitHub, Clerk Authentication, Zod, React Hook Form, API integration, Zustand

Languages

- **Spanish:** Native
- **English:** Intermediate (actively improving)

Featured Personal Projects | [Github](#)

Blog platform | [Live Demo](#)

A full-featured blogging platform where users can register and log in, create, edit, and delete posts, publish content using a rich text editor with validation, upload images with preview and validation, filter posts by categories, and manage their own profile and avatar.

Technologies: Next.js, Node.js, Express, MongoDB, JWT, Tailwind CSS, Cloudinary

Movies App | [Live Demo](#)

Web application that allows users to search movies, watch trailers, access detailed information, and navigate between sections using React Router. It consumes the TMDb API to fetch real-time data and includes a responsive design with dark/light mode support.

Technologies: React, JavaScript, React Router, Tailwind CSS, TMDb API

Personal Blog / Learning Journal | [Live Demo](#)

Personal blog developed with a modern and responsive interface to document my learning journey in web development. I regularly publish technical articles, tutorials, and reflections about technologies such as React, Next.js, JavaScript, and related tools.

Technologies: Astro, Tailwind CSS, Node.js, MongoDB

Education

Information Systems Engineering

National Technological University (UTN)

Relevant Experience (Non-Tech)

- **Customer Service:** Development of communication skills, conflict resolution, and user-oriented problem solving.
- **Manual & Operational Work:** Teamwork, organization, responsibility, and time management.
